

When teacher relies on someone else to keep his/her or school data on the school computer, many problems may occur:

- School's or teacher's own multimedia content will not be in the same folders on all school computers.
- Sometimes teacher's personal folders and files may be renamed
- or even deleted!

Why Content Wasting?

As a real professional, every teacher should always be ready for a backup option. If it is not late, the same teacher's files (if he/she has them at all) should be carried on flash memory. Texts, photographs, tables, sound and video files will always be with him/her. And teacher will be satisfied. But not for long.
